

# PICAXE etc

From Peru to present  
Tim(othy) Clark (eclipse)

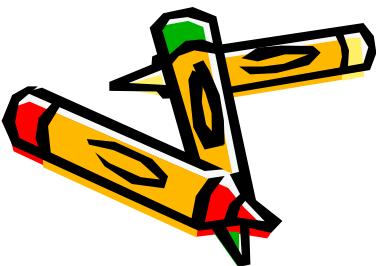

# Apologies

- Sorry for the suckyness, I am new to this!!
- Sorry for the microsoftness
- Sorry if I go on for too long

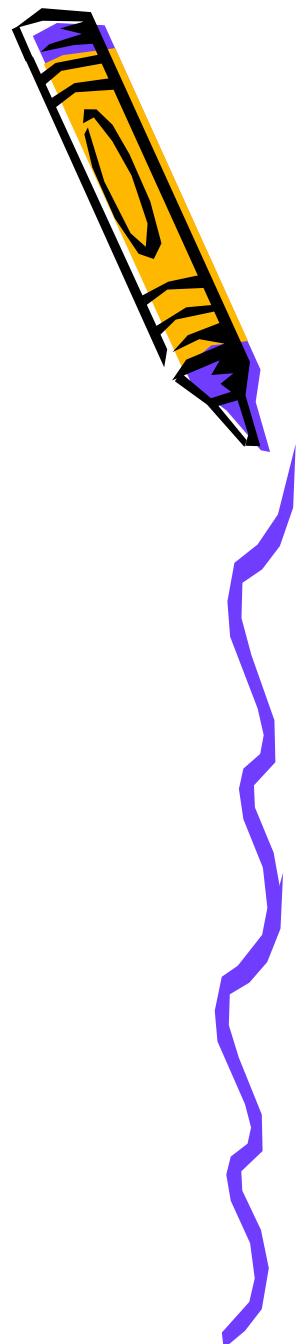

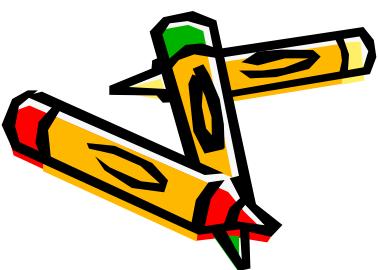

# In Deepest Peru

- Peru 2005
- Mmmm computer control
- Time in deepest Peru = lots of things to do when I got back

# Now onto PICAXE

- PICAXE = PIC + Bootstrap
- PICAXE = fluffy + cuddly
- Download program in circuit
- BASIC like language
- Program Editor

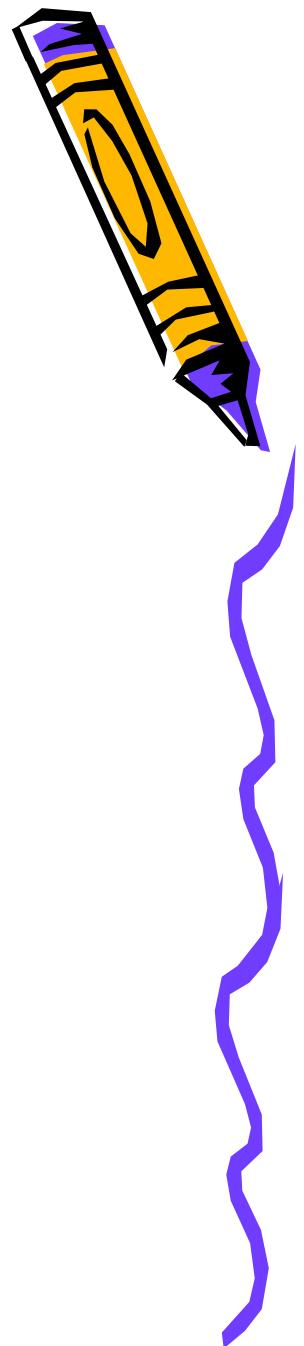

Programming Editor - [C:\DOCUMENTS AND SETTINGS\TIM\MY DOCUMENTS\TRAIN CONTR...]

# Language

- BASIC like syntax
- High 2
- Low 2
- Pwmout 2, 100, w3
- Serin 3, N2400, b0, #w3

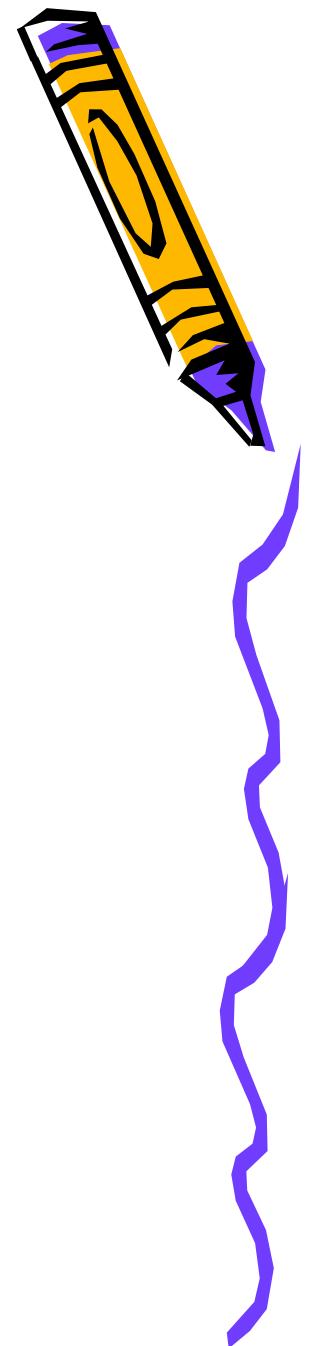

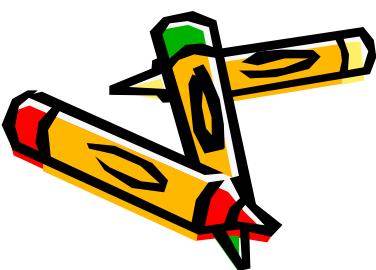

# Where to start?

- HyperTerminal
- WOW
- Serial in + PWM
- WOW

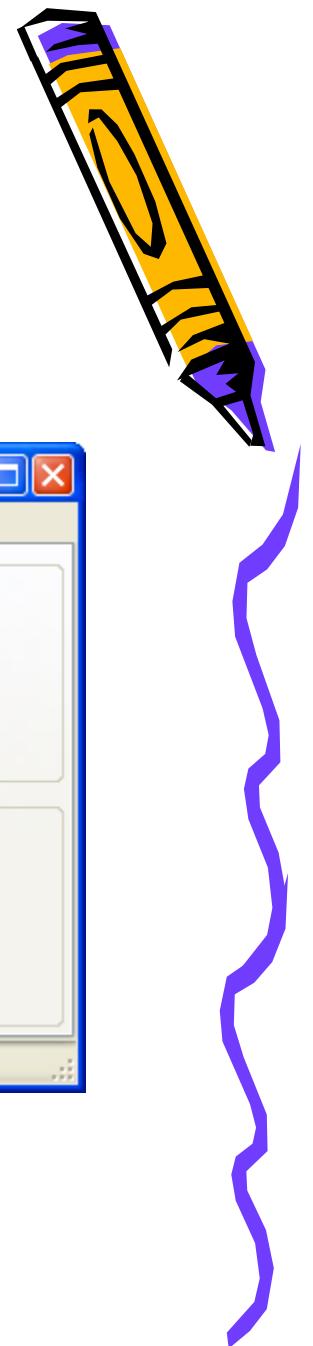

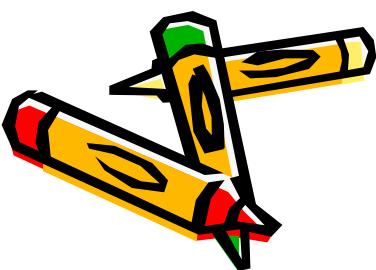

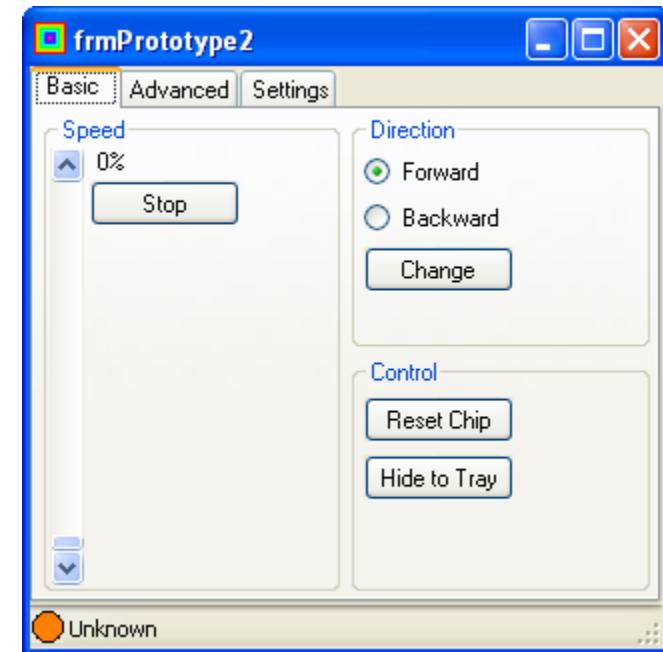

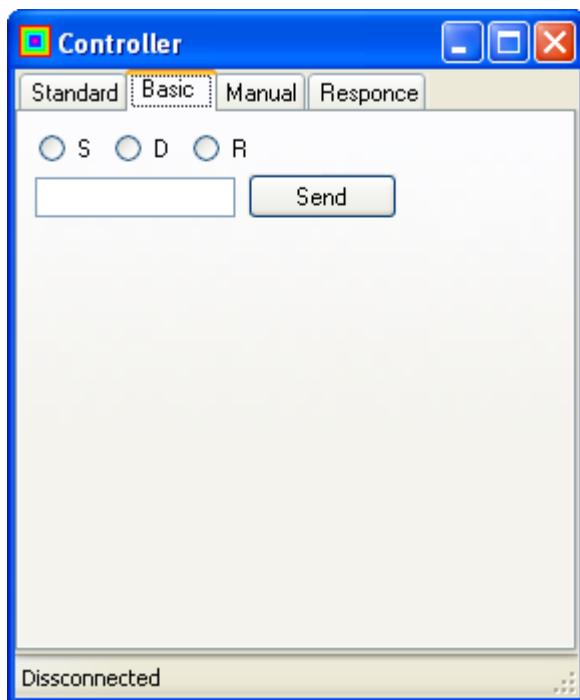

# Improvements

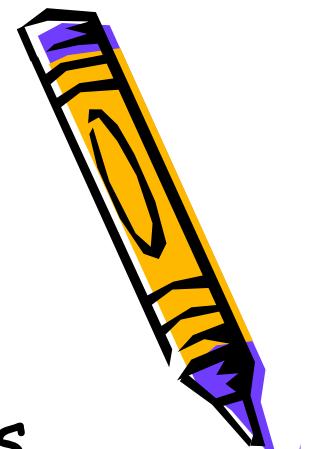

- + more circuitry etc
- + even more circuitry etc
- Ewwww Visual Basic

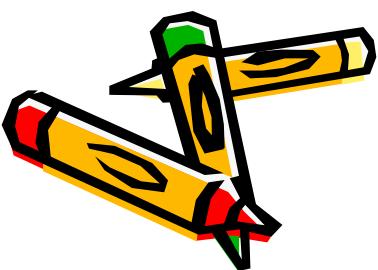

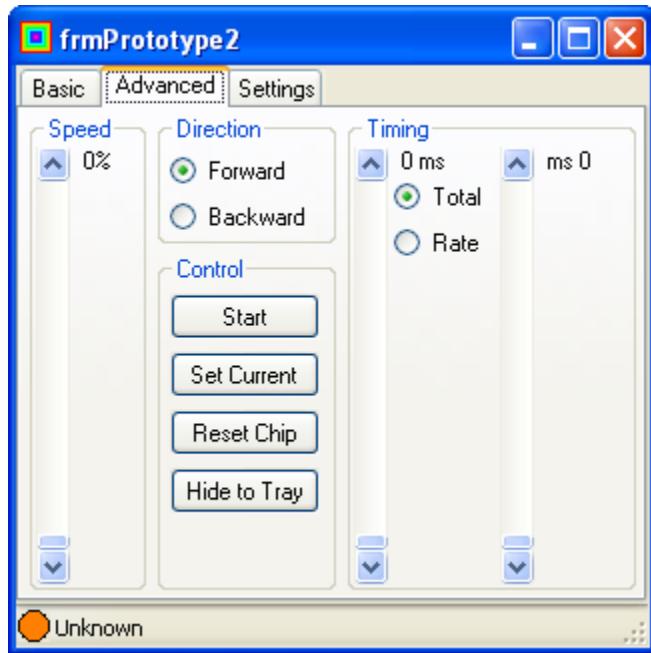

# Now for the UI

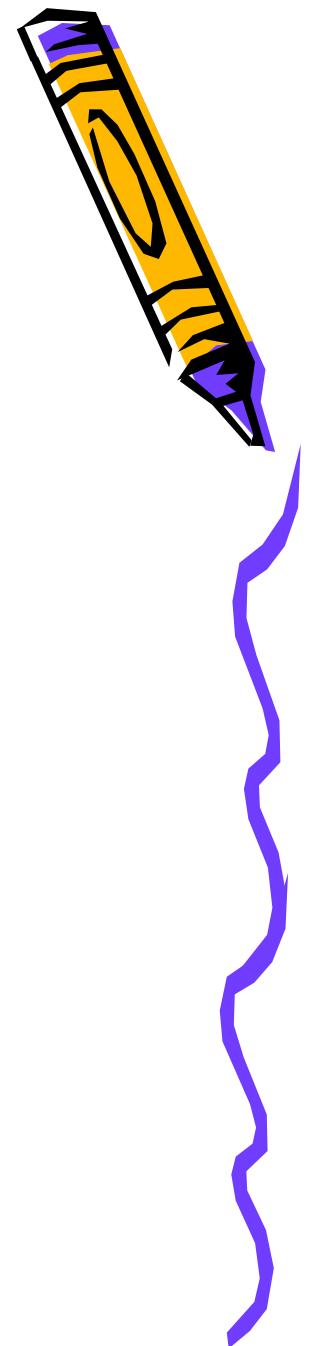

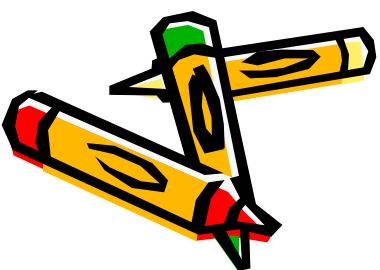

# Now it gets whizzy

- Smooth Changes
- Network Control
- More to come yet

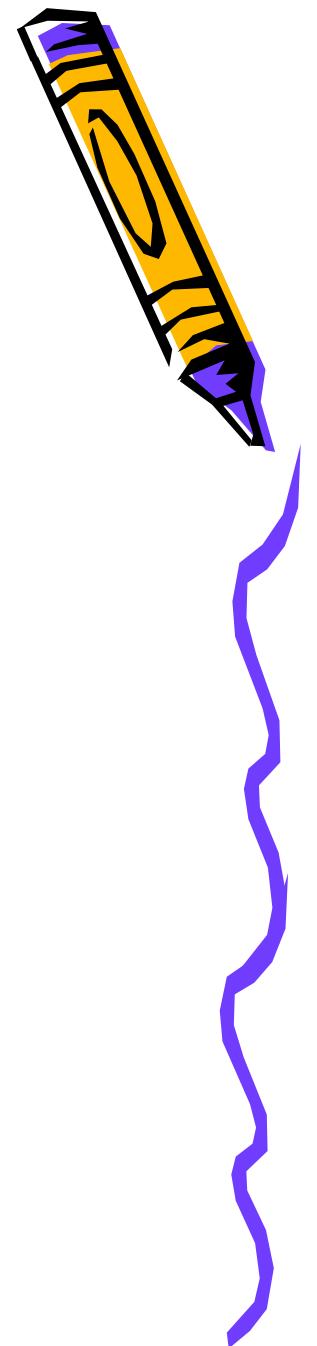

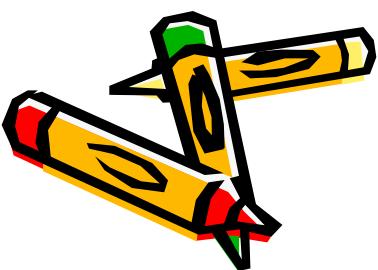

# DEMO!

# What Next

- Change Language
- Fix transistor bug
- Add input detection
- Add major programming

Any  
Questions?
